

IP PoE Clock Series SP500

Overview

The 13.7" PoE analog clock features a durable, lightweight housing designed for seamless integration into any professional environment. It's operated via Power over Ethernet (PoE), receiving automatic synchronization of time via NTP server, no need of master clock. The NTP PoE Clock supports Daylight Saving Time. The synchronized time can be applied in various facilities, including schools, transportation, healthcare, military, government, etc.

Features

- Classic and durable design
- Classic ticking second hand
- DHCP or Static IP addressing.
- Supports daylight saving time
- Accuracy ± 1 second
- Plug-and-Play PoE
- Software free of charge

Specification

Network	
Ethernet	10/100 Base-TX, RJ45
Data Protocol	NTP, SNTP
Routing Protocol	IPv4
Compatibility	EEE802.3af
IP Addressing	Static IP address or DHCP
Device management	Free software
Power Supply	
Power Input	PoE or 5V/1A power adapter
General	
Operating Temperature	-10°C to 60°C
Operating Humidity	90% maximum, non-condensing
Accuracy	approximately ±1 second
Mounting Option	Wall, Surface
Material	Plastics
Color	Black
Dimension	34.8cm*30cm*7cm
Weight	0.8KG
OEM/ODM	Yes
Warranty	1 year
Compliance	
Certificate	CE, FCC, RoHS
